

Curious about air quality in your home?

BORROW ONE FREE WITH YOUR LIBRARY CARD!

You can now borrow a Carbon Dioxide (CO2) monitor from Temiskaming Shores Library!!

Devices can be borrowed for 3 weeks!

Ventilation and carbon dioxide (CO2) measurements are two of the many precautions that can be taken to protect yourself and your community from airborne infections. Comparing indoor CO2 readings to the baseline outdoors can give us an idea of how well a space is ventilated.

Please note: These devices are not carbon monoxide detectors and are not life safety devices.

Thank you to Rise  for their generous donation of three devices!
